

## *Sanctuary Remodel*

The Trustees Committee recently created two places in the sanctuary for wheelchair accessibility. We are now in the process of looking at remodeling the chancel area of our sanctuary this fall. We intend this project will be completed Fall 2020, prior to re-opening the sanctuary for in-person worship.

We are looking at:

1. Creating steps that will extend all across the front of the “stage”.
2. Installing a ramp on the south side (left side, as you face the cross) that will make the chancel area accessible to all.
3. Removing the permanent communion rails and replacing them with removeable ones.
4. Making the platform that the altar sits on either smaller, or totally eliminate it.

These changes will make the chancel/altar area more open and inviting and will facilitate a greater variety of space usage.
